

SHBBHRS004 Provide Hair Reduction Treatments Using Electrical Currents

Course Overview

Electrolysis is the only permanent method of hair removal that can be offered to clients. It involves removing individual hairs from the face or body by inserting a fine probe into the hair follicle.

This specific short course was designed specifically for Beauty Therapists wanting to upskill. Under the guidance of our expert Electrolysis Lecturer, you'll be guided through safely performing this technical treatment.

Course Cost:

\$850 - with all pre-requisites met

Schedule:

3 day course

Date & Time:

See website (acbt.edu.au)

Pre-requisites:

Must hold a qualification in the following:

- A Certificate IV in a beauty qualification
- OR
- Diploma of Beauty Therapy AND
 - SHBBINF001 Maintain Infection Control Standards unit (an additional \$150 will be added to the cost if you do not hold this pre-requisite unit. It will be completed alongside your electrolysis training)

What you will receive:

Each student will receive a Statement Of Attainment (for unit code SHBBHRS004 Provide hair reduction treatments using electrical currents - release 1) and SHBBINF001 Maintain Infection Control Standards unit.

What you will learn:

- Establish priorities with clients
- Synthesise knowledge on skin and hair biology and electric currents
- Design, prepare and provide electrolysis treatment
- Review treatment and provide post-treatment advice
- Theory and practical assessments
